The aim of this paper is to present the work of implementing a computer aided design (CAD) system and computer aided Simulation (CAS) for sheet metal blanking dies. The program is a collection of ...

## **Computer Aided Cutting Simulation in Sheet Metal Blanking**

Computer-aided simulations offer perhaps the best way to test large system capacities. They offer better training and advantage over traditional full-scale exercises with regard to plan validation, determining the adequacy of adaptive capacities, and supporting the decision-making of unified staffs.

Computer simulation is the reproduction of the behavior of a system using a computer to simulate the outcomes of a mathematical model associated with said system.

Yield Improvement of Castings using Computer Aided Simulation ... By using computer simulation, an optimum gating system can be designed to improve the acceptability of the casting. Hence work has been done in this regard to analyse the defects of a casting and thus improve its acceptability. Keywords: Yield, acceptability, gating system, computer simulation. I. INTRODUCTION melting of the ...

Diagrams, and Computer-Aided Design/ Manu-facturing (CAD/CAM). Live simulations are simulated operations with real operators and real equipment. Examples are fire drills, operational tests, and initial production run with soft tooling. Virtual Simulation Virtual simulations put the human-in-the-loop. The operator's physical interface with the system is duplicated, and the simulated system ...
