Descriptive geometry (or darstellende Geometry as it is called in German) is a tool to solve problems in three dimensional space constructively in the plane. My own high school teacher Roland Staerk is an expert in that subject and has written a book (PDF) about it.

Descriptive Geometry - Darstellende Geometrie

Descriptive geometry appeared as a subject in the timetable at secondary schools in 1850s at realschules 2 , before that, geometry was taught only as a part of drawing and mathematics. In the 19 th century descriptive geometry was taught only at realschules, later also at real
