Longitudinal welded pipes with enhanced fatigue strength

Fatigue life. The American Society for Testing and Materials defines fatigue life, N_f , as the number of stress cycles of a specified character that a specimen sustains before failure of a specified nature occurs. For some materials, notably steel and titanium, there is a theoretical value for stress amplitude below which the material will not ...

SHIP STRUCTURE COMMITTEE THE SHIP STRUCTURE COMMITTEE is constituted to prosecute a research program to improve the hull structure of ships and other marine structures by an extension of knowledge pertaining to design, materials and methods of construction,

SSC-331 DESIGN GUIDE FOR SHIP STRUCTURE DETAILS

To ensure that a steel bridge design can be safely, economically and reliably executed (fabricated, assembled and erected), designers should be aware of the processes of fabrication and erection, the capabilities and limitations of the steelwork contractor and how the design choices affect those processes.
