

genes culture and human pdf

Summary. Follow human geneticist Spencer Wells, Director of the Genographic Project of the National Geographic Society, as he tracks down the genetic changes associated with the ability to digest lactose as adults.

“The Making of the Fittest: Got Lactase? The Co-evolution

Dual inheritance theory (DIT), also known as gene-culture coevolution or biocultural evolution, was developed in the 1960s through early 1980s to explain how human behavior is a product of two different and interacting evolutionary processes: genetic evolution and cultural evolution.

Dual inheritance theory - Wikipedia

Decades-long efforts to map human disease loci, at first genetically and later physically, followed by recent positional cloning of many disease genes and genome-wide association studies, have generated an impressive list of disorder-gene association pairs (4, 5).

The human disease network | PNAS

Human skin color ranges in variety from the darkest brown to the lightest hues. An individual's skin pigmentation is the result of genetics, being the product of both of the individual's biological parents' genetic makeup, and exposure to sun.

PERSPECTIVE - ALGORISM

This site includes biographical profiles of people who have influenced the development of intelligence theory and testing, in-depth articles exploring current controversies related to human intelligence, and resources for teachers.

Human Intelligence: biographical profiles, current

3 a socially constructed and scientifically invalid system of biological categories is insufficient but necessary for undermining contemporary institutional racism.]

RACE Project Bibliography

Trophoblast cells are specialized cells in the placenta that mediate the interactions between the fetus and mother. Okae et al. report the derivation of human trophoblast stem cells from blastocysts and early placentas, which will provide a powerful tool to study human placental development and function.

The Human Intestinal Microbiome in Health and Disease

The truth is the human condition is the agonising, underlying, core, real question in all of human life, of are humans good or are we possibly the terrible mistake that all the evidence seems to unequivocally indicate we might be?
