Logical positivism and logical empiricism, which together formed neopositivism, was a movement in Western philosophy whose central thesis was verificationism, a theory of knowledge which asserted that only statements verifiable through empirical observation are cognitively meaningful.

Logical positivism - Wikipedia

Logical positivism is a philosophical movement that emerged in the early 20th century, primarily in the work of the Vienna Circle. It is characterized by its emphasis on empirical verification and the rejection of metaphysics. The central thesis of logical positivism is that only statements that can be verified through empirical observation are cognitively meaningful. This view of knowledge is often contrasted with the traditional view of knowledge as a collection of propositions that can be true or false, regardless of whether they can be verified.

Logical positivism - Music

The term typology is used in many fields. For example are Carl G. Jung's psychological types famous . In Library and Information Science (LIS) is typology used, for example about document typologies.
