

magnetic stimulation of the pdf

Transcranial magnetic stimulation (TMS) is a form of neurostimulation. TMS is a non-invasive procedure in which a changing magnetic field is used to cause electric current to flow in a small targeted region of the brain via electromagnetic induction.

Transcranial magnetic stimulation - Wikipedia

The National Institute for Health and Care Excellence (NICE) has issued full guidance to the NHS in England, Wales, Scotland and Northern Ireland on repetitive transcranial magnetic stimulation for depression in December 2015.
