Mass spectroscopy pdf 1. CONTENTS: 2. INTRODUCTION Mass spectrometry (MS) is an analytical technique that measures the mass-to-charge particles. It is used for determining masses of particles, for determining the elemental composition of a sample or molecule. The MS principle consists of ionizing chemical compounds to generate charge molecules or molecule fragments and measurement of their ...

Mass spectrometry is a powerful analytical technique used to quantify known materials, to identify unknown compounds within a sample, and to elucidate the structure and chemical properties of different molecules. The complete process involves the conversion of the sample into gaseous ions, with or without fragmentation, which are then characterized by their mass to charge ratios (m/z) and ...
