Method. This is a retrospective, cross-sectional study carried out in Londrina, ParanÃ¡, from 2000 to 2009. The study population consisted of mothers at the extremes of maternal age, i.e., up to 19 years old and 35 years or older, whose children died before reaching one year of age.

Extremes of maternal age and child mortality: analysis

Deaths in the first month of life, which are mostly preventable, represent 46 per cent of total deaths among children under five. As mortality among children under five declines globally, deaths among these children are more and more concentrated in the first days of life.
