Engineering Mechanics Course Notes Robert Tyas . 2 Introduction to Module This module is designed to give the student a broad range of competences in applied mechanics. Emphasis will be placed on the application of formulae and not on their derivation. Mechanics is the study of the static and dynamic behaviour of particles rigid bodies under the influence of an applied force or forces. It is a ...

Section 2 Introduction to Statistical Mechanics 2.1 Introducing entropy 2.1.1 Boltzmann's formula A very important thermodynamic concept is that of entropy S. Entropy is a function of state, like the internal energy. It measures the relative degree of order (as opposed to disorder) of the system when in this state. An understanding of the meaning of entropy thus requires some appreciation of ...
