About: Probabilistic programming languages (PPLs) unify techniques for the formal description of computation and for the representation and use of uncertain knowledge.

MERRY. CHRISTMAS and Happy New Year! We are thankful for 2018 and sincerely wish you and your family a safe and prosperous 2019. We are mostly staying around Sugar Land so we can fill book orders through the holiday season.

A Bayesian network, Bayes network, belief network, Bayes(ian) model or probabilistic directed acyclic graphical model is a probabilistic graphical model (a type of statistical model) that represents a set of variables and their conditional dependencies via a directed acyclic graph (DAG).

A number of different Markov models of DNA sequence evolution have been proposed. These substitution models differ in terms of the parameters used to describe the rates at which one nucleotide replaces another during evolution.

As far as probabilistic forecasting 4 is concerned, the topic was not present in the EPF literature until Zhang et al. published two conference papers in 2002 (not visible in Fig. 2) and the first probabilistic EPF article in 2003 in IEEE Transactions on Power Systems, see the narrow white bars in the right panel of Fig. 2.
