Special Issues. As of February 2015, Accounts of Chemical Research introduced a newly formatted special issue in which articles accepted for a special issue will appear online when ready in one of our regular monthly issues, while at the same time, appearing in the special issue itself being built online on its own dedicated webpage.

A design-to-device study, based on algorithmic encodings of structure-property relationships, is used to identify new materials with panchromatic optical absorption. 9431 dyes are mined from the literature and optimally paired together to afford sensitizing dyes with complementary optical absorption properties.

ABSTRACT. Nanocomposites, a high performance material exhibit unusual property combinations and unique design possibilities. With an estimated annual growth rate of about 25% and fastest demand to be in engineering plastics and elastomers, their potential is so striking that they are useful in several areas ranging from packaging to ...
