Lecture 12 Mechanisms of Oxidation and Corrosion

History. The first report of a floating-gate MOSFET was made by Kahng and Sze, and dates from 1967. The first application of the FG MOS was to store digital data in EEPROM, EPROM and flash memories.

IOSR

In addition to publishing our Journal and Proceedings, ASPE sponsors the publication of various other works. As a service to our members, we also maintain the following list of publications that we believe are of interest to our members.

ASPE Publications > Recommended Reading

Microfabrication is the process of fabricating miniature structures of micrometre scales and smaller. Historically, the earliest microfabrication processes were used for integrated circuit fabrication, also known as "semiconductor manufacturing" or "semiconductor device fabrication".

Microfabrication - Wikipedia

Deep neural networks (DNNs) have attracted significant attention for their excellent accuracy especially in areas such as computer vision and artificial intelligence.

FP-BNN: Binarized neural network on FPGA - ScienceDirect

Various NBTI models have been proposed, of which the Reaction-Diffusion (R-D) model is the most prevalent. In this model, interface traps are generated at the SiO₂/Si interface (reaction) with a linear dependence on stress time.
