Life is a characteristic that distinguishes physical entities that have biological processes, such as signaling and self-sustaining processes, from those that do not, either because such functions have ceased (they have died), or because they never had such functions and are classified as inanimate.

### **Life - Wikipedia**

The possibility of life on Mars is a subject of significant interest to astrobiology due to its proximity and similarities to Earth. To date, no proof has been found of past or present life on Mars.

What do food cravings mean? Some nutritionists and healthcare providers believe that certain cravings are meaningful. For example, some experts think that craving large amounts of ice and nonfood substances, such as laundry starch and dirt or clay (a condition called pica), are linked to an iron or zinc deficiency, though there's not enough ...
